RUBIN ELEZI

Profile

I am second year student for Software Engineering at CIT. I first started programming with python when I was a kid. My main focus is web development I have very good knowledge of

- HTML5
- CSS
- JS
- Vue.js
- PHP
- SQL

I'm eager to learn new technologies. With my PHP skills I can also work with WordPress themes and plugins and customize them.

With my programming knowledge, I believe I can more easily learn new technologies as needed and I am open to do so, learning new libraries and frameworks becomes easier when you have strong fundamentals.

You can take a look at my portfolio here: <https://rubinelezi.com/>
Aslo my girhub: <https://github.com/RUBINELEZI>

I have also created my own PHP MVC mini framework, this is nothing fancy compared to other frameworks like Laravel, but I built it to understand better the MVC pattern and how things work, and now I found myself using it on my projects because it forces to write good and maintainable code and get things up and running fast.

<https://github.com/RUBINELEZI/tooDumb-PHP-framework>

I have worked 2 years as a video editor with Adobe Premiere Pro, and I have solid skills in Adobe Photoshop too.
